Cc: "Carpenter, Glenn - Beltsville, MD", Kelly Shenk, "McAfee, Robert -

Rich: Thanks. I think this will work better as well. I hope that the discussion in the meeting on our CEAP watersheds synthesis lessons learned can include not only monitoring in small watersheds to document conservation effects or effectiveness but also lessons learned about land treatment, adoption and maintenance of practices, etc. You may find that you and Kelly or others would want to participate in that discussion as well. The team that is working on this is from various places around the country (not local), so while they can come in for this meeting, we'll have to plan ahead because of travel. I'll get back to you and Kelly with some possible weeks they are available and we can go from there.

I also hope that you and Roberta and I can get together for a short meeting some day to talk about the CEAP Roadmap and input you might have had for that.

Thanks for your interest,
Lisa

Lisa-

Thanks for sharing some of your ideas and questions for how we proceed forward. As Kelly indicated in her email response, I have asked her to work closely with you, Roberta and Glenn on drafting up the agenda for our upcoming meeting. I am still committed to actively participate and ensuring the right folks from our teams are also involved in the July meeting and beyond.

In terms of the recommended follow-up actions related to monitoring, following our July meeting, I will ask Peter Tango, the Chesapeake Bay Program Watershed Monitoring Coordinator and the leader of our Monitoring Team in Annapolis, to follow up with you directly to get in contact with counterparts within CEAP. I think a separate meeting would be more productive than attempting to pull in our respective monitoring colleagues to our July 27th meeting

Thanks, Rich

RE: Modelers meeting

Glenn and Rich: My apologies for not responding to Rich's email yet either. I was on travel when it came in (actually at our PA CEAP watershed site in the Bay watershed) and then just didn't get back to it. I'll send you some more input on the agenda tomorrow, but some initial input is that I definitely want to follow up on Rich's bullet on the CEAP Roadmap. However, after talking about this with Roberta Parry, I think that Rich and I would need Roberta in on that discussion and she will not be at our end of July meeting. I suggest that Rich and Roberta and I (and whoever else is interested, probably not Rich's whole team or ours) set up a separate meeting to discuss this particular item. We can pull some of those from the discussion on modeling on the 27th, but there will likely be others that we can explore separately.

* Work to get Chesapeake Bay Program partnership's collaborative efforts build into NRCS's CEAP "Roadmap" plan.

On the item below, this another discussion I will have to facilitate. We can either set up a separate meeting for Rich's team on the CEAP Watershed Synthesis study including lessons learned on monitoring and more discussion on that or try to pull in some of these folks by phone on the 27th. My feeling is that the agenda will be full with all the many CEAP Cropland related items and what is likely to be intense thinking about that. I wonder if we are better off addressing this opportunity in a separate meeting also for a few hours to learn more about and discuss this topic?

* Set up opportunities to hear more about lessons on monitoring design and station siting from CEAP watershed studies; work

to translate into continued expansion of the Chesapeake Bay watershed monitoring network.

Please let me know what you are thinking.

We should include the item on the model output comparison in well characterized watersheds with ARS as part of the agenda on the 27th. I sent a separate email about that.

Thanks,
Lisa

Lisa, Daryl, and Lee: I got this message from Rich Batiuk a couple weeks ago and have not had a chance to act on it. We need to start looking at an agenda for the meeting on July 27. Looks to me from the attached list that possible central topics revolve around CEAP results, integrating those results into CBP, SWAT/AGNPS/CBP5.3 watershed model comparison, and getting CBP data needs requests integrated into NASS Farmer Survey.

What do you all think?

Glenn

Glenn-

Thanks for the email message. I am in the process of polling my Chesapeake Bay Program Office colleagues for their availability the week of July 26th.

In preparation for the meeting, I would like to see us collectively make some significant headway on the action items I put forth coming out of April 9th meeting (see attached file), particularly in terms of sharing more information on the CEAP findings in advance to make for a more productive meeting. Next week I would like us to start following through with the appropriate folks on these action items and any that you and your NRCS colleagues may have come up with.

Thanks, Rich

 Modelers meeting

All. Lets go ahead and get this meeting scheduled. I assume the last week of July is still OK with folks. I assume this will be an almost all-day meeting so we only need to accept dates. I assume Rich Batiuk will schedule his folks.

Here goes:

| | 17-26 | 17-27 | 17-28 | 17-29 | 17-30 |
|--|-------|-------|-------|-------|-------|
| | | | | | |

| | | | | | |
|-------------|----|----|----|----|----|
| Glenn | OK | OK | OK | OK | OK |
| Carpenter | | | | | |
| | | | | | |
| Lee | | | | | |
| Norfleet | | | | | |
| | | | | | |
| Lisa | | | | | |
| Duriancik | | | | | |
| | | | | | |
| Daryl Lund | | | | | |
| | | | | | |
| Roberta | | | | | |
| Parry | | | | | |
| | | | | | |
| Rich Batiuk | | | | | |
| | | | | | |

Go ahead and select dates and reply to everyone so we all know the acceptable dates.

Hopefully this will go relatively smoothly.
